FACIALS

JAN MARINI
SKIN RESEARCH

40% Glycolic Acid Peel

Targets pigmentation, acne, fines lines and wrinkles. Alpha Hydroxy Acid 'Glycolic' is derived from sugar cane and has the smallest molecular structure of the AHA family and therefore can penetrate into the skin much more effectively than other Alpha Hydroxy Acids.

Glycolic acid loosens the "glue-like" attachments or cellular cement that is characteristic of many skin conditions such as ageing, acne, skin discolouration and coarse texture. After just a few weeks your skin looks brighter, clearer and dry skin becomes hydrated and smooth.

Face - £60.00

Back - £80.00

A Course of six Jan Marini peels is recommended for optimum results over a six to twelve week period.

Anyone who wishes to undergo a glycolic peel must first prep their skin for two weeks prior to the first peel with the Jan Marini skin management system.

A course of 6 facial peels including your prep kit - £360.00

FACIALS

CACI Non-Surgical Facials

CACI uses microcurrent to gently tighten and tone the muscles of the face whilst smoothing the appearance of fine lines and wrinkles. The results are further enhanced by the use of 'electro buds'. The buds contain a powerful electrically conductive, hexapeptide formula with instant skin firming properties.

Results are visible after one treatment. However, for maximum and more permanent results a course of 10 treatments are recommended over 4 weeks.

Treatment Pricing

CACI Facial - £45.00

Course of 10 - £360.00

CACI Facial with Hydratone Mask - £52.00

For intensive hydration and skin firming, the Hydratone CACI combines an electrically conductive hyaluronic gel mask with microcurrent rollers so that the whole face is bathed with rejuvenating energy.
